

Appin No. 09/575,159  
Amdt. Dated July 21, 2005  
Response to Office Action of June 6, 2005

5

### **REMARKS/ARGUMENTS**

The Office Action has been carefully considered. The issues raised are traversed and addressed below with reference to the relevant headings and paragraph numbers appearing under the Detailed Action of the Office Action.

#### ***Detailed Action***

In paragraph 6 of the Office Action the Examiner has objected to the term spatial extent as lacking an antecedent basis. Accordingly, the claim has been revised to refer to visible information having a spatial extent. We also believe that this overcomes the additional objection raised in paragraph 6 to the phrase "visible information in the spatial extent" as being unclear. In particular, this indicates that the visible information has a spatial extent and that the spatial extent corresponds to the user interactive element. We believe that the revised claim is now clear, particularly when read in view of page 10, lines 12 and 13 of the specification, which clarify that the graphic has a spatial extent corresponding to the zone, which is the interactive element.

Appln No. 09/575,159  
Amdt. Dated July 21, 2005  
Response to Office Action of June 6, 2005

### CONCLUSION

In light of the above, it is respectfully submitted that the objections and claim rejections have been successfully traversed and addressed. The amendments do not involve adding any information that was not already disclosed in the specification, and therefore no new matter is added. Accordingly, it is respectfully submitted that the claims 1 to 19, and the application as a whole with these claims, are allowable, and a favourable reconsideration is therefore earnestly solicited.

Very respectfully,
